XO BOATS INTRODUCES TWO NEW MODELS - XO Cruiser

XO will introduce two new models in Boot, Düsseldorf 2017, XO Cruiser and XO DFNDR.

XO Cruiser is a great boat to have a fun summer day or a weekend out on the sea and it is equipped with all you can imagine to ensure this. You can enjoy the sunny day on a large sun bed while jumping for a swim. As well you can have your summer meal on a table of six people prepared on barbeque installed on an electrically elevated wet bar. The two fridges of the boat ensure that you will not run out of cool drinks on your way.

This boat is ideal for a day or a weekend trip. There is a very spacious front cabin with a large double bed and a toilet with shower. Webasto heating ensures comfortable accommodation for 4 people in the front cabin and under a canopy in the cock pit.

"XO Cruiser is your own little island in your own archipelago where you can enjoy your summer day with the important people of your life in addition to the superb driving experience", says XO Boats CEO Dan Colliander.

Like all XO Boats, XO Cruiser is designed for a fun driving experience. The roots of XO lie in the tough conditions of the Finnish archipelago, which are also an integral part of XO Cruiser's DNA. The superior military grade aluminium hull ensures the most enjoyable and solid ride cutting through the waves with its deep v-hull, slim shape and long water line. The driver and the co-driver will be sitting in the middle of the boat on comfortable fully suspended XO sport seats with all the necessary equipment to master the most enjoyable driving experience such as double Simrad navigation system, automatic Zip Wake trim control and bow thruster to name some.

XO Cruiser will be ahead of its time by introducing the new Naviop iLoop digital boat control system that enables you to digitally both monitor and control all the systems on the boat like observing the voltage of your batteries or controlling lights.

XO Cruiser will be powered by up to 350 hp twin outboard engine setup and is recommended with a joystick control for the most enjoyable overall driving experience. XO Cruiser is delivered with a full spec Premium equipment selection with an extensive range of options. Everything on this boat has been carefully selected to ensure a thrilling and enjoyable experience when exploring your very own archipelago wherever it is.

The world premiere of XO Cruiser will be in Boot Düsseldorf in January 2017 together with XO DFNDR.

Technical details:

- Length: 9,6 m (without engine)
- Beam: 2,77 m
- Height above water line: 1,92 m
